ABOUT ME

Game Programmer with backing of Computer Science with 4+ years of experience in programming. Worked in personal projects and with teams up to 40 people, using engines such as Unity and Unreal Engine or with low-level tools. I like to work in serious projects and not so serious ones.

HARD SKILLS

Software architecture design and implementation. Gameplay mechanics, AI and Systems programming. C++, C#, Python, Lua. GitHub. Unreal Engine and Unity. Blueprint visual scripting. OpenGL.

SOFT SKILLS

Task management for a small team of programmers. Communication and mediation between departments. Teamwork. Openness to feedback. Patience and empathy. Critical thinking.

EXPERIENCE

Game Programmer

Feb 2026 - Present

Black Hat Studios

Lead Programmer in Unstrung, a puzzle and narrative centered game, made with **Unreal Engine 5**

- **Management of the programming team tasks** and the **GitHub** repository
- Design and implementation of the **camera and event system** in **C++** and **Blueprints**
- Developed **gameplay mechanics** (Buttons, levers, lifts, pushing boxes, trapdoors)
- Support of design and art teams in tech-related problems

C# and .NET developer intern

Oct 2024 - Jun 2025

SealPath

Programmer in the desktop app of SealPath, a cybersecurity company centered on file encryption

- Development of new functions for the SealPath Desktop app in **C#** and **C++**
- Augmented the maximum desktop encryptable file from 2GB to more than 100GB
- Developed an automatic watermarking system for Word, PowerPoint, Excel and PDF files

Researcher Intern

Jan 2024 - Jun 2024

HiTZ Zentroa

Awarded an Ikasiker Scholarship by the Basque Government to collaborate on a research project.

- Learned about **deep neural networks**
- Developed a medical document anonymization which identifies personal and sensible data

EDUCATION

Master's Degree in Game Development, Computer Games and Programming Skills

U-Tad | Oct 2025 - Present

Learned Game Development by the hands of professionals in the industry.

- Master's Final Project: Unstrung

Bachelor's Degree in Computer Engineering in Management and Information Systems

UPV/EHU | Sep 2021 - Jul 2025

- Bachelor's Final Project: Loop Escape
- Loop Escape is a game of the rogue-like genre, which awarded me a 10/10 score with highest honors
