ABOUT ME

Game Programmer with background in Computer Science and 5+ years of experience in programming. Worked on personal projects and with teams of up to 40 people, using engines such as Unity and Unreal Engine, as well as low-level tools. I enjoy working on both serious projects and not-so-serious ones.

HARD SKILLS

Software architecture design and implementation. Gameplay mechanics, AI and Systems programming. C++, C#, Python, Lua. GitHub. Unreal Engine and Unity. Databases (SQL, MongoDB, ...). Windows and Linux.

SOFT SKILLS

Task management. Teamwork and communication. Openness to feedback. Patience and empathy. Critical thinking.
